Dr. Simon Adamtey is a professor of construction management at Kent State University where he teaches several courses at both the undergraduate and graduate levels. Dr. Adamtey is originally from Ghana where he obtained his bachelor’s degree in construction management. He holds a master’s in construction management from Bowling Green State University, Ohio and a PhD in construction management from Indiana State University, Indiana. After receiving his bachelor’s degree, Dr. Adamtey worked in the civil construction industry for a couple of years before moving to the commercial construction sector. In the United States, he has worked in both the commercial and residential sectors. In addition to teaching, he also conducts research that is broadly focused on infrastructure delivery and project management. He has several publications on project delivery methods, quality management, construction risk management, and technology applications.
